Valued-Based Assistance to Complex Medical and Behavioral Health Patients, 2nd Edition emphasizes the field has now moved from “ complexity assessments ” to “ outcome achievement ” for individuals/patients with health complexity. It also stresses that the next steps in VB-ICM must be to implement a standardized process, which documents, analyzes, and reports the impact of VB-ICM services in removing patient barriers to health improvement, enhancing quality and care coordination, and lowering the financial impact to patients, providers, and employer groups. Written by two expert case managers who have used VB-ICM in their large fully disseminated VB-ICM program and understand its practical deployment and use, the second edition also includes two authors with backgrounds as physician support personnel to case managers working with complex individuals. This edition builds on the consolidation of biopsychosocial and health system case management activities that were emphasized in the first edition. A must-have resource for anyone in the field, The Integrated Case Management Manual: Value-Based Assistance to Complex Medical and Behavioral Health Patients, 2nd Edition is an essential reference for not only case managers but all clinicians and allied personnel concerned with providing state-of-the-art, value-based integrated case management.

Designated a Doody's Core Title! An ideal reference guide for case managers who work with complex, multimorbid patients, The Integrated Case Management Manual helps readers enhance their ability to work with these patients, learn how to apply new evidence-based assessments, and advocate for improved quality and safe care for all patients. handbook also provides international best practices and shows how integrated care does work throughout various health systems. The delivery of health and social care is characterised by fragmentation and complexity in most health systems throughout the world. Therefore, much of the recent international discussion in the field of health policy and health management has focused on the topic of integrated care. “ Integrated ” acknowledges the complexity of patients needs and aims to meet it by taking into account both health and social care aspects. Changing and improving processes in a coordinated way is at the heart of this approach.
