Because of its simple design, the robot can also survive being stepped on by a 120-pound human. Small, robust robots like these could be ideal for conducting search and rescue operations or ...

A collection of 8 short stories and 2 novels about robots by the 20th century American science fiction writer

A collection of all of Isaac Asimov's robot stories, including some which have never before appeared in book form.

The development of robot technology to a state of perfection by future civilizations is explored in nine science fiction stories.

Called to the Spacer world to solve a case of roboticide, New York City detective Elijah Baley teams up with humanoid robot R. Daneel Olivaw to prove that the prime suspect, a renowned roboticist, is innocent of the crime. Reprint.

?NAL launches its new SF imprint, ROC, with a collection of 18 of Asimov's (Foundation) robot stories. The earliest tales here, written from 1940 to 1960, remain among the most-loved in the field, the best being "Little Lost Robot," about a robot who obeys an order to "get lost." "The Bicentennial Man" (1976) about one robot's desires and efforts to be first free, then equal, is the quintessential robot-as-man's-mirror story. The book concludes with brief essays offering companionable commentary on the history of robots in fiction, the Frankenstein complex, the origin of Asimov's famous Three Laws and the author's own surprise at the emergence of robots during his lifetime. Review "This collection offers 18 stories about robots as well as brief essays in which Asimov comments on robots in fiction, the Frankenstein complex, his famous Three Laws and the development of actual robots. "The earliest tales here, written from 1940 to 1960, remain among the most-loved in the field." —Publishers Weekly "Classic stories with new material, both fiction and fact, that puts the whole theme together in a larger context." —Poul Andersen About the Author Isaac Asimov authored over 400 books in a career that lasted nearly 50 years. As a leading scientific writer, historian, and futurist, he covered a variety of subjects ranging from mathematics to humor, and won numerous awards for his work.

The Coin Slot Chronicles series, by former NFL running back and Dancing with the Stars champion Rashad Jennings, is a humorous and imaginative series that explores the power of friendship and imagination, the challenges in finding your place, and the reality of missing home. Eleven-year-old Arcade Livingston has a problem. Several, actually. The Tolley twins, a.k.a. neighborhood bullies, are making Arcade's move to a new city even harder than it needs to be. They expect him to do their research papers and interactive displays for the sixth-grade career expo's theme: "What do you want to be when you grow up?" Besides doing their work, Arcade doesn't even know his own answer to that question. Then at the library—Arcade's favorite place to chill—a mysterious old woman gives him a golden arcade token that grants him a unique gift. A gift that allows him to time travel between different places including his own future. From sitting in the dugout with Babe Ruth, to hanging on to the back of a bucking bull, to performing life-saving surgery on a dog, Arcade has no shortage of adventure! Together with his older sister, Zoe, Arcade explores life's biggest thrills and challenges, and the two also have a big mystery to solve. Who is the rightful owner of the incredible Triple T Token that leads to such astounding adventures? Arcade's circle of friends begins to widen as the Triple T Token hangs from his neck. Pulsing. Beckoning another adventure. The question for Arcade, Zoe, and their new friends is no longer, "What do you want to be when you grow up?" It's, "Where will we go next?"

Long ago, Gladia's robots Daneel and Giskard played a vital role in opening the worlds beyond the Solar system to Settlers from Earth. Now the conscience-stricken robots are faced with an even greater challenge. Either the sacred Three Laws of Robotics are in ruins - or a new, superior Law must be established to bring peace to the galaxy. With Madam Gladia and D.G. Baley - the captain of the Settler traders and a descendant of the robots' friend Elijah Baley - Daneel and Giskard travel to the robot stronghold of Solaria...where they uncover a sinister Spacer plot to destroy Earth itself.

Artificial intelligence threatens to disrupt the professions as it has manufacturing. Frank Pasquale argues that law and policy can avert this outcome and promote better ones: instead of replacing humans, technology can make our labor more valuable. Through regulation, we can ensure that AI promotes inclusive prosperity.
