Four specific trends are driving the DVR industry: consumer content choice, consumer content control, personalization of content libraries, and the ability to transfer content from device-to-device and person-to-person. "Digital Video Recorders" features a macro and micro views of the already established yet still burgeoning DVR industry. As part of the NAB Executive Technology Briefing series, this book gives you a wealth of market knowledge, business models, case studies, and industry insights explained in a non-technical fashion. "Digital Video Recorders" discusses the impact of the technology across many different industries and platforms, explains hardware, software and technology of set-top boxes, DVR infrastructure, on-screen guides, planning and scheduling, content security, and more. Whether you are an executive in the broadcast, telecommunications, consumer electronic, or advertising space, you will expand your knowledge on DVR impact, explore new business opportunities, and get a brief overview of the

technical terms needed. You will also be able to accurately analyze and understand the trends, projections and other data, all of which will help lead to the expedited growth and development of DVR industry.

"It's the money you don't spend that ultimately gives you the freedom to live the life you love!" You work hard for your money. You know you should save some, but it seems like every month something comes up that sets back your best laid plans. If you're tired of working hard just to get by, this user-friendly guide shows you that you can slash the cost of nearly everything you need without sacrificing joy and quality of life. Mary Hunt shows you how to get off the monthly money roller coaster. She offers the specific techniques, resources, and motivation you need to keep more of your money every month, including •finding money you didn't know you had •cutting your grocery bill by 50% •controlling the mother of all budget-busters •avoiding fees •paying off your mortgage •saving on bills •preparing for disaster •paying less for your dream car •planning family vacations •and more It's time to start saving, giving, and finally making financial progress, and with humor and compassion, Mary Hunt is leading the way!

Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key data.

In *Tracking the Audience: The Ratings Industry From Analog to Digital*, author Karen Buzzard examines the key economic, political, and competitive factors that have influenced ratings methods dominant in each of the markets for radio, TV, and the Internet, tracing the practice's history from its early beginnings up to its most recent advances. Beginning with the birth of the industry in 1929, *Tracking the Audience* traces the establishment of a standardized ratings "currency" as it evolved to meet the needs of the analog broadcast system, and explores the search for new gold standards necessitated by the devastating effects of the digital revolution. Buzzard examines key challenges to the established system by discussing the movement from traditional sampling methods to new, more transparent measurements. More than a history of the ratings industry itself, it also tracks the evolving business model for the broadcast industry. *Tracking the Audience: The Ratings Industry From Analog to Digital* shows how the development of conceptual tools designed to measure and package radio, TV, and Internet audiences is the result of a variety of historical factors. With a detailed examination of ratings providers, their methods, and their attempts to adjust to meet new demands a digital age, this volume explains how a standardized broadcast system of audience measurement ratings has evolved, and where it is going in the

future.
