This concise introduction to Numerical Methods blends the traditional algebraic approach with the computer-based approach, with special emphasis on evolving algorithms which have been directly transformed into programs in C++. Each numerical method used for solving nonlinear algebraic equations, simultaneous linear equations, differentiation, integration, ordinary differential equations, curve-fitting, etc. is accompanied by an algorithm and the corresponding computer program. All computer programs have been test run on Linux Ubuntu C++ as well as Window-based Dev C++, Visual C++ and Turbo C++ compiler systems. Since different types of C++ compilers are in use today, instructions have been given with each computer program to run it on any kind of compiler. To this effect, an introductory chapter on C++ compilers has been added for ready reference by the students and teachers. Another major feature of the book is the coverage of the practicals prescribed for laboratory work in Numerical Analysis. Each chapter has a large number of laboratory tested programming examples and exercises including questions from previous years' examinations. This textbook is intended for the undergraduate science students pursuing courses in BSc (Hons.) Physics, BSc (Hons.) Electronics and BSc (Hons.) Mathematics. It is also suitable for courses on Numerical Analysis prescribed for the engineering students of all disciplines.

Presents the complete screenplay for "The Da Vinci Code" as well as behind-the-scenes photographs and details from the production of the film.

Three hundred years before the time of The Glass Dragon, Coronnan is a kingdom at war with itself, magic is wild, and magicians uncontrolled, each working separately for his own goal. At the height of this age of chaos, the dragons decide to intervene, making their presence known to mortals through the healer Myrilandel.

This guide takes the mystery out of butchering, covering everything you need to know to produce your own expert cuts of beef, venison, pork, lamb, poultry, and small game. John J. Mettler Jr. provides easy-to-follow instructions that walk you through every step of the slaughtering and butchering process, as well as plenty of advice on everything from how to dress game in a field to salting, smoking, and curing techniques. You'll soon be enjoying the satisfyingly superior flavors that come with butchering your own meat.
