Sketch with Asia is the first major publication from online Manga art phenomenon, Asia Ladowska. Asia blends her experience in hyper-realism with her passion for Manga, creating a style she is well-loved and recognized for. In this book she shares more of her art and behind the scenes information, along with numerous tips and tutorials for any budding Manga artist. Presented in a high quality, hardback book of 204 pages, is a detailed look at Asia's processes from drawing expressions,to coloring hair (Manga - Asia-Style). The sharing of her processes is something Asia regularly indulges her 720k + followers in, and she has set up a regular, inspirational #SketchwithAsia challenge on Instagram. Asia was also a judge on the 2018 judging panel for the prestigious animation industry awards, The Rookies, which further satisfied her passion for inspiring the next generation of Manga artists.

What's going on inside our bodies? How do we move, eat, think, and breathe? Children will love looking inside the human body to discover the answers with this incredible interactive book. With labeled acetate diagrams of the muscular, skeletal, respiratory, circulatory, digestive, excretory, and nervous systems, this is a fantastic first look at human anatomy. From pumping blood to breathing air, The Body Book is an exciting way to explore all the amazing things our body can do.

When their island becomes too crowded, Luke turns his railroad engine into a boat and sets sail for remarkable adventures among people he has never seen before.

Everyone in Dorothy's family wears glasses except her. Does that mean she doesn't belong? She decides to solve this problem, with mixed results, and realizes that being different doesn't make her any less a part of her family.

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. “Believe me,” the general said. “I’ve taken part in many sieges but this,” he waved towards the castle walls, “is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squalors who never went to war.” Brilliantly vivid, as insightful as it is compelling, The Siege is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

Urville, the capital of a large island province, has a population of nearly 12 million, making it the one of the most significant cities in Europe. It is also entirely imaginary. Gilles Trehin, an autistic man with exceptional creative talents and an obsession with large cities, conceived and developed Urville over the course of 20 years. He shares his vision in this beautifully illustrated guide to the city, which he renders convincingly real in nearly 300 drawings of different districts of Urville. He describes, in remarkable detail, the architectural styles of its individual buildings and provides historical, geographical, economic and cultural information. This includes historical figures and cultural anecdotes grounded in historical reality - Trehin accounts for the effects of the Vichy regime, the Second World War and globalisation on his imagined city. This book offers fascinating evidence of and insight into the creative power of the autistic mind and will be of interest to people with autism and without.

Two Years' Vacation and Family Without a Name (2 Books) This is the name of the sequence of fifty-four novels written Jules Verne, originally published between 1863 and 1905. Verne's editor Pierre-Jules Hetzel, said that the goal of these novels was "to outline all the geographical, geological, physical, and astronomical knowledge amassed by modern science and to recount, in an entertaining and picturesque format ... the history of the universe." In Verne's own words, his intention was "to complete, before my working days are done, a series which shall conclude in story form my whole survey of the world's surface and the heavens; there are still left corners of the world to which my thoughts have not yet penetrated. As you know, I have dealt with the moon, but a great deal remains to be done, and if health and strength permit me, I hope to finish the task." Verne's meticulous attention to detail and scientific trivia, coupled with his sense of wonder and exploration, are the backbone of the Voyages. Part of the reason for the broad appeal of his work was the sense that the reader could acquire knowledge of geology, biology, astronomy, paleontology, oceanography, etc., as well as to travel to the exotic locations and cultures of the world through the adventures of Verne's protagonists.

The great Russian psychologist L. S. Vygotsky has long been recognized as a pioneer in developmental psychology. But his theory of development has never been well understood in the West. Mind in Society corrects much of this misunderstanding. Carefully edited by a group of outstanding Vygotsky scholars, the book presents a unique selection of Vygotsky's important essays.
