A lavishly illustrated, full-color companion to Scott Westerfeld's New York Times bestselling Leviathan trilogy. A must-have for any fan of Scott Westerfeld's Leviathan trilogy, The Manual of Aeronautics is an illustrated guide to the inner workings of the Darwinist and Clanker powers. Loaded with detailed descriptions and elaborate, four-color illustrations of Darwinist beasts and Clanker walkers, weapons, transport, and uniforms, this manual highlights the international powers that Deryn and Alek encounter throughout their around-the-world adventures. This guide draws back the curtain and reveals the inner depths of Westerfeld's fascinating alternative world.

The recent debate over civil trials or military tribunals for suspected terrorists has focused public attention on the American court system. A cornerstone aspect to the federal courts is the grand jury, which investigates crimes against the United States and secures the constitutional right of grand jury indictment, two responsibilities needing broad powers. A US District Court summons a grand jury, so the jury's jurisdiction is geographically restricted by the court to which it is attached. The grand jury conducts its business in secret, but that independence does not often result in the dismissal of indictments. Although witnesses subpoenaed to appear before the grand jury are not often excused, they do benefit from several legal rights when testifying. This book presents a broad overview of the rules and background of the federal grand jury, a needed service for anyone wishing to understand the American system of justice and its potential use in the war on terror.

Authoritative, influential yet accessible to students this textbook addresses one of the most important aspects of commercial law. Its enduring role as the definitive guide to the law surrounding the sale of goods cements its position as the market leading text for undergraduate and postgraduate students alike. Uniquely, key differences between Scots and English law in this area are highlighted throughout equipping the reader with a thorough understanding of the regulatory regimes governing the sale of goods in both jurisdictions.

Tasked with descending to the underworld and killing the furies so that the Scions can stop fighting amongst themselves, Helen must endure hellish torture whenever she goes to sleep - she wanders around the various levels of hell with no idea how to complete her task, and she's beginning to suffer from extreme exhaustion. Helen carries on with her mission, and for the first time meets another person down in the shadowy underworld: Orion, descended from Adonis and with the power to control desire, he is the heir to the house of Rome and an outcast. He's also kind of hot. Confused by her conflicting emotions but glad to have an ally in hell, Helen begins to realise the enormity of her task...

In this engaging biography, readers will learn about the builder of board games, Milton Bradley. Follow the story from Bradley's childhood, his early entrepreneurial work creating and selling stationary, his drafting education at Harvard, his first business creating and selling lithographs, and how these experiences came together when he formed the Milton Bradley Company and created the Game of Life. Bradley's family, retirement, and work producing educational materials to support the new movement in education called kindergarten are included. Sidebars, historic photos, and a glossary enhance readers' understanding of this topic. Additional features include a table of contents, an index, a timeline and fun facts. Aligned to Common Core Standards and correlated to state standards. Checkerboard Library is an imprint of Abdo Publishing, a division of ABDO.

With the popularity of digital photography growing by leaps and bounds over the last decade, some say film has been dying a slow death ever since 1 or is already dead. The reality is that film has never gone away, and in recent years has experienced a surging, renewed popularity 1 sometimes simply for its retro, analog status, but mostly for film's ability to create a look and feel that many believe digital can still not achieve. If anyone can attest to this, it's Utah photographer Jonathan Canlas, who exclusively shoots with film, and has both an extremely successful wedding photography business as well as a series of popular workshops held numerous times per year around the world. In Film Is Not Dead: A Digital Photographer's Guide to Shooting Film, Canlas teams up with co-author Kristen Kalp to open the doors for anyone who wants to begin/return to/shooting film. Casual, irreverent, fun, inspiring, and beautiful, this unique 10x8 hardcover book teaches the reader the basics of film, cameras, and shooting in this medium. Whether it's discussing the different tone and color characteristics of different films (Kodak, Fuji, etc.), how to load a medium-format camera back, how to create proper exposures, how and where to get film processed, or how Jonathan uses fun, plastic cameras like the Holga in his commercial and personal work, Film Is Not Dead appeals to anyone who is searching to finally begin creating that film look, but until now hasn't known where to start.

Globalization is the buzzword of the hour. Ill-defined but inescapable, it denotes the spread of Anglo-Saxon capitalism across the world. Columbus' crossing of the Atlantic in 1492 paved the way, and Western nations have raced to dominate the world marketplace ever since. This brilliant selection of cartoons from both sides of the Atlantic deftly illustrates key themes in the progress of globalization. With an entertaining year-by-year summary of economic and political events over the last half century, and a fascinating chronology of globalization's milestones from Columbus onwards, this deceptively lighthearted guide is also a fact-packed work of reference.

First published in 1985, this is a reissue of the seminal text on the work of Jerzy Grotowski and Laboratory Theatre recognised as being one of the most influential and important studies of the Polish theatre practitioner. In 1984 Grotowski's Laboratory Theatre closed down after twenty-five years of ceaseless experimentation pushing at the boundaries of the nature of theatre. From tiny beginnings in provincial Poland, Grotowski's influence spread to Eurpoe and the United States, fuelled first by the international tours of his remarkable company and then by "paratheatrical" participatory projects which attracted adherents all over the world. This study of his work remains one of the most important and thorough examinations of the history, theory, and post-theatre work of this most influential of theatre practitioners.

Living in a gray world of silhouette, Lord Taris Wellingham conceals his fading eyesight from society. He has long protected himself from any intimate relationships. Plain twenty-eight-year-old Beatrice-Maude Bassingstoke does not expect to attract any man, especially not one as good-looking as her remote traveling companion. Forced by a snowstorm to spend the night together, these two lonely people seek solace in each other's arms. The passion they unleash surprises them both. Then a new day dawns!.
