Luckily enough there is a solution, for the PD and CR engines. It is replacing the balance shaft module for a chain driven oilpump as seen in other TDI engines. The 140HP 2.0 8v PD TDI (BMM) for example has that oilpump and it has been flawless. So, if you buy any 2.0 check for availability of the balance shaft module and replace the damn thing.

The Touran was the first vehicle to use Volkswagen's 2.0 TDI engine. The engines available at the launch included a 1.6 FSI and two diesel engines, the 1.9 TDI with 74 kW (101 PS; 99 hp) and the 2.0 TDI 103 kW (140 PS; 138 hp). The engines are EURO 4 compliant, except the 1.9 TDi when paired with the DSG (direct shift gearbox).

and informative manner, the book begins with a multi-disciplinary overview of the major sources and unique classes of PM, detection techniques, and their impact, including molecular changes resulting in health effects. It then goes one step further by proposing and examining the means to curtail and contain PM generation and ameliorate their impacts. *Particulates Matter: Impact, Measurement, and Remediation of Airborne Pollutants* offers a high-quality reference guide to PM that will greatly benefit technology leaders in environmental compliance groups, epidemiologists and other public health professionals focused on pollution and health, and researchers and scholars working in pollution, climate change, and urbanization. It may also be useful to advanced undergraduate and early graduate students in environmental sciences. Includes a summary of the current knowledge on nanoparticles as pollutants and their negative health effects Provides a framework for the evolution and maturation of air pollution characterization and mitigation Describes an integrated set of engineered solutions that account for the concatenated relationships between technology, policy, and society necessary for long-term success

There are few industry sectors in the world today with more potential than renewable and hydrogen energy. Clean, green and renewable energy technologies are receiving immense emphasis from investors, environmentalists, governments and major corporations. Today's high prices for crude oil, coal and natural gas will increase the demand for renewables of all types. A wide variety of technologies are being researched, developed and implemented on a global basis, from Stirling engines to wind power, from advanced nuclear plants to geothermal and fuel cells. Our analysis also includes tar sands (oil sands), oil shale, fuel cells, clean coal, distributed power, energy storage, biofuels and much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources. This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of the 250 leading companies in all facets of the alternative, renewable and hydrogen energy business. Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in the business.
