The T4 was the 4th generation VW Transporter by Volkswagen Commercial Vehicles. Produced between 1991 and 2003 it was the replacement for the T25 or T3 VW Transporter. The T4 represents the biggest shift in thinking across the entire VW Transporter range in that it was the first Transporter to have the engine in the front. This may be attributed to the new T4 Transporters being much more modern and car like to drive than the T25s they replaced.
